. Electoral Vote Calculation

Example scenario to reach 270+ electoral votes:

- California (55)
- Texas (38)
- Florida (29)
- New York (29)
- Illinois (20)
- Pennsylvania (20)
- Ohio (18)
- Michigan (16)
- Georgia (16)
- North Carolina (15)
- New Jersey (14)

Hypothetical Electoral Scenario for Robert F. Kennedy Jr.

- Virginia (13)

Total from larger states: 283 electoral votes

Additional potential from smaller states:

- Alabama (9)
- Connecticut (7)
- Iowa (6)
- Kansas (6)
- Louisiana (8)
- Mississippi (6)
- Nevada (6)
- Utah (6)
- Arkansas (6)
- West Virginia (5)
- New Mexico (5)

Potential additional electoral votes: 70

Grand total potential: 353 electoral votes

Strategy

- . Focus on winning major cities in both large and small states.
- . Target influential counties outside major metropolitan areas.
- . Prioritize states with higher electoral votes while not neglecting smaller states that could be crucial in a close race.
- . Tailor campaign messages to resonate with urban and rural voters in each state.

Conclusion

This hypothetical scenario assumes strong performance in both urban areas and significant smaller counties across various states. The inclusion of smaller states provides additional pathways to reach or exceed the 270 electoral vote threshold. However, this remains a highly optimistic and simplified scenario for illustrative purposes only. Actual electoral outcomes would depend on numerous complex factors including voter turnout, campaign effectiveness, current political climate, and many other variables that cannot be accurately predicted.
